IN THE SPECIFICATION

Please correct the spelling error on page 1, paragraph 3 as below.

One attempt to solve this problem has been disclosed in US Patent 4,111,650, whereby C.I. Basic Blue 100 is formulated as a stable concentrated solution by employing N-methyl pyrrolidone together with benzyl alcohol and a lower aliphatic carboxylic acid. However, the use of N-methyl pyrrolidone may be considered as disadvantageous ~~form~~ from the ecological and toxicological viewpoints, since such dipolar aprotic solvents readily penetrate through the skin.
